REGULATIONS

Trails End POA Rules & Regulations

Guidelines

The Board of Directors has developed the following Rules and Regulations with a schedule of fines for the safety and welfare of all property owners and their guests.

Once a violation is over one year old, it cannot be used in establishing a new fine providing no other violations were registered against that same individual or property within that one year period.

Payment of Fines

- Any fine incurred by a property owner(s) for whatever reason and not paid within thirty (30) days will be added to the dues of the individual property owner(s). The Association will notify the property owner(s) of all such fines and all legal aspects.
- Any property owner(s) who fail to pay the assessed fine shall not be considered as a member in good standing and shall be subject to all other remedial actions, such as the disconnection of utilities, as set forth in the Association Restrictive Covenants, By-laws, and Rules and Regulations.
- In addition, an annual interest rate of 15% shall accrue on all unpaid fines.
- All fines shall be held current and shall be paid in full within thirty (30) days from the date said fine is assessed unless the fine is appealed to the Association Rules Enforcement Committee or the Court, in which case the thirty days shall run from the date of decision by the Rules Enforcement Committee or Court.

IX. PROPANE TANK REGULATIONS -Excerpts from Pennsylvania Regulations

The following are regulations concerning all propane tanks from the Dept. of Labor & Industry. For everyone's safety please read and abide by them.

If you have any questions you may contact the Dept of Labor & Industry directly (717) 787-2923

Settings - Tanks and cylinders shall be set upon firm foundations (not placed directly on ground) or otherwise fairly secured. Vessels shall have flexible piping connections or special fittings if settling conditions may affect the safety of the connections.

Treatment after damage – Cylinders which have been exposed to fire or otherwise damaged shall not be used again until they have been returned to a manufacturer for repair and retest.

Requalification – Cylinders shall be requalified for service at least within ten years of their manufacture and every five years after that. A cylinder that leaks, is bulged, has defective valves or safety devices, bears evidence of physical abuse, fire or heat damage, or detrimental rusting or corrosion, must not be used unless it is properly repaired and requalified as prescribed in these regulations.

Location – Cylinders, control valves, and regulating equipment enclosed in a housing and comprising a complete system shall be mounted on the chassis of the vehicle as close to the hitch as practicable. They must be installed according to RV manufacturer specifications as well as PA regulations. No cylinders shall be installed, transported or stored, even temporarily, inside of any mobile living unit.

Valves – Valves in the assembly of a two-cylinder system shall be arranged so that replacement of cylinders can be made without shutting off the flow of gas to the appliances.

Piping & Equipment – shall be installed, braced and supported so as to reduce to a minimum the possibility of strain or wear. Piping shall not be installed in proximity to sources of extreme heat.

The gas line shall be installed to enter the vehicle through rubber grommets or equivalent in the floor directly beneath the appliance which it serves. When a branch line is required, the tee connection shall be in the main gas line and located under the vehicle.

Filling of cylinders –Cylinders shall be filled at a properly equipped cylinder filling plant or tank truck which complies with all requirements. The cylinder filling operation shall only be performed by qualified personnel.

Gas fired heaters –Gas fired space heaters and water heaters shall be of the full vented type, vented to the outside of the vehicle. Air for combustion shall come from the outside of the trailer. Each such appliance shall be equipped with a device designed to shut off the supply of gas to the main burner and to the pilot in the event the pilot flame is extinguished.

As per Board of Directors October 2008: Under no circumstances will propane tanks be stored in any structure. Citation for reckless endangerment will be issued if caught storing propane tanks.

NOTE: Please check your propane tank for the date of manufacture. If it is over ten years old, you must have the tank recertified. The office has information on where this can be done. After the ten years, the tank must be recertified every five years after that. If your tanks are provided by a propane company, they are responsible for the propane tank. Your tanks will not be refilled if they are outdated.

THESE ARE ONLY “EXCERPTS” FROM PA REGULATIONS ON PROPANE. COMPLETE COPIES ARE AVAILABLE IN THE OFFICE.
